

Safe technology for a clean environment

Innovative stainless steel products for

- Drinking water delivery, treatment, storage and distribution
- Wastewater treatment
- Stormwater overflow tanks
- Biogas plants
- Manholes

➤➤ Manhole equipment

The complete equipment – All around the manhole

- Manhole covers
- Safety climbing systems
- Finished manholes made of stainless steel
- Air vents
- Shaft and rising pipes

➤➤ Technical doors

Always the right access – safety for the object

- Double-skinned doors
- Chlorine room doors
- Pressure doors up to 30 m water column
- Manholes
- Inspection holes
- Louvres
- Stainless steel windows

➤➤ Property protection

Increased security to prevent unauthorised access – for any requirements

Unauthorised access to free water surfaces in drinking water reservoirs, technically important stages in the wastewater treatment process, or manholes must be prevented or eliminated.

- Doors certified to security of DIN V ENV 1627, inspection level RC 3 and RC 4
- Louvres accessible from inside only
- Attack-proof manhole covers, optionally load-bearing

Such equipment increases the resistance time of structures and hinders unauthorised persons or casual offenders.

➤➤ Railings, bridges, platforms

Safety with elegance – walkway protection

- Fix-Rail® stainless steel railing
- Compartment / tank access with ladders, doors, stairs
- Stairs in accordance with applicable standards and laws, with anti-sliding surface
- Spiral stairs
- Bridges over pipelines with big diameters
- Platforms and footbridges with stable consoles for wall mounting
- Handrails

➤➤ Wall ducts / Pipeline pieces

Expertise through the wall – for life wall ducts

- Fitting and enlarging pieces
- Fittings
- Pipe fixings
- Wall ducts
 - One-side / two-sides sealed
 - For retrofit installation through drillings
 - One-side sealed, axially adjustable
 - With one-side connection flange

➤➤ System solution: Hygiene in drinking water storage tanks

Drinking water protection against germination and impairment

- Equipment components completely made of stainless steel and acid treated in a pickling bath
- Air filter plants for aeration of the drinking water storage tank
- Optimum flow in the drinking water storage tank
- Design assurance
- Keeping the regulations of safety at work, avoiding accidents

HUBER headquarters and production at Berching, Bavaria

Production specifically meeting the requirements of the material

For decades HUBER has specialised in stainless steel manufacture. Having already considered the features of stainless steel during construction, careful processing and expert installation result in a perfect final product. There are many different types of stainless steel and we understand this better than anyone.

HUBER stainless steel products are carefully manufactured – a guarantee for long life and optimum function. This means highest operational reliability. And who wants to take into account the costs for later refurbishment already in the planning stage?

Quick, reliable delivery

Designers can base their planning on a wide range of standard products. Many items are manufactured in batches and stored at the HUBER factory. This results in a short delivery time to customers and competitive price. The customer can be sure of top quality service from a first rate company.

We also provide our experience and our know-how with special design for individual customer requirements.
